

THE ADVENTURE BEGINS

Awake each morning to our amazing vista with hot coffee delivered to your cabin. The choice of daily activities at Baranof Wilderness Lodge is as varied and exciting as any to be found in Alaska. You set the pace and pick the adventures that interest you the most.

The unpressured waters around our lodge offer the most abundant and diverse fresh- and freshwater fishing available in Alaska. Dozens of spectacular bays, estuaries, fishing streams, and lakes are within a short boat ride or hike from our lodge.

Whether it be fresh- or saltwater fishing, hiking, up close and personal whale watching, photography, pulling crab or shrimp pots, beach combing or kayaking, we have the experienced trained professional crew to guide you on the adventure of the day.

Our Coast Guard 5-Star rated 25-foot cabin cruisers are available to take you on fishing and sightseeing expeditions of your choice. Monster halibut, five species of Pacific salmon, many rock fish, Dolly Varden, and trout fill our bays, estuaries, and streams and can be caught in impressive numbers. Our program specializes in blue-water fly-and light-tackle fishing with opportunities to sight-cast to moving schools of bright salmon. We will cater the daily expeditions to anglers of all persuasions.

Our all-inclusive package comes complete with all top-quality salt- and freshwater rods and tackle, rubber boots, and rain gear for ocean days, waders and boots for the rivers and lakes. In our main lodge we have a fully equipped fly tying bench available to you along with personal fly fishing lessons and instructions.

The rich and fertile waters of our backyard are where some of the world's largest concentrations of humpback whales congregate to frolic and feed on the summers blooming food chain.

We offer unparalleled opportunities to view, photograph, and listen to these amazing creatures as they vocalize and sing their songs captured with our state-of-the-art hydrophones as they perform their cooperative "bubble net" feeding.

DOING IT RIGHT

Our remote Alaskan platform has been crowned one of the most popular family fishing vacations in the world.

Our group sizes are small, our guest experience maximum, our impact minimal, and our footprint left behind and light as possible. At Baranof Wilderness Lodge, we have chosen to provide personal attention and quality adventures while maintaining our responsibility to the planet over profit. By practicing stewardship and recycling, and through education we can minimize the impacts our presence. "Green" powered, we operate our entire lodge by a micro-hydro system.

With respect, we just want to preserve these precious ecosystems for future generations while immersing ourselves and our guests into the greatest fisheries and wild places in Alaska.

We are proud to operate our lodge and camp under coveted special-use permits issued to us by the Tongass National Forest and the Togiak National Wildlife Refuge. Our guests have access and can choose from dozens of available guided expeditions into the heart of these thriving river systems and wild places such as Admiralty Island National Monument, which flourishes with the largest density of great coastal brown bears on planet earth.

At Baranof Wilderness Lodge we practice the use of barbless tackle and catch and release practices on all freshwater fisheries. We will vacuum pack and freeze your catch from the ocean waters with one travel box of fresh halibut and salmon per guest.

We would be honored to have you join us, and we have all made a pact to give you our very best to make your ultimate Alaskan Dream come true.
